

CPR E 431

BASICS OF INFORMATION SYSTEM SECURITY

Wireless, IoT, and Cloud Security

Module Overview

Module Objectives:

- Wireless, IoT, and Cloud Security
- By the end of this module you will be able to:
 - ✓ Identify threats to wireless, IoT, Cloud and Internet networks
 - ✓ Understand the concept of securing wireless networks and how it differ from securing wired networks
 - ✓ Apply security mechanisms for wireless networks using GENI/ORBIT platform

Wireless, IoT, and Cloud Security

Introduction to WiFi
Security

Introduction to
Cellular Networks
Security

Introduction to Cloud
Security

Introduction to IoT
Security
