Lightening Talk #2: Project Plan

We will be having several "Lightning Talks" throughout the semester in which each team will prepare a 5-minute power point presentation with annotated voice commentary and slide transitions. The intention is to give you a bit of technical presentation experience and to force you to think about important aspects of your project.

Lightening Talks are **group** assignments. For a 5-minute presentation, you may want to limit your talk to 4-6 slides. Each member of the group should participate to narrate the presentation. **Please say your name before starting your voice commentary.**

The second Lightning Talk is due on 3/8 Sunday. Only one submission is needed from each team. The topic will be your Project Plan that you are incorporating into your Design Document v1. Here, your challenge is to distill your in-depth plan into a 5-minute overview of the project's key technical goals, the primary conceptual sketch or system block diagram, and walk-through of your timeline.

Lightening Talk #2

Criteria	Ratings			Pts
Content	5.0 pts Excellent Discusses all the required components: the project's key technical goals, primary conceptual sketch or system block diagram, and project timeline.	3.0 pts Good Discusses some but not all the required components.	0.0 pts No Marks No discussion on any required components.	5.0 pts
Participation	5.0 pts Excellent All team members participate in the talk.	3.0 pts Good Some but not all team members participate in the talk.	1.0 pts Poor A single team member narrates the entire presentation.	5.0 pts
Total Points: 10.0
